***Drawings***

1. A replacement drawing of Figure 8 was received on 4/9/08. This drawing is acceptable and has been entered.

***Specification***

Amendments made by Applicant to the specification to obviate the objections presented in the previous Office Action are proper and have been entered. These objections have been withdrawn.

***Allowable Subject Matter***

2. Claims 1, 4, 5, and 7-14 (*renumbered 1-11, respectively*) are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding *amended* claim 1, this claim is now allowable for the reasons indicated in the previous Office Action pertaining to now cancelled claim 6, as well as additional reasons.

Specifically, *Bertram in view of Robinett* provides the teachings as spoken of in the previous Office Action.

*Bertram, Robinett, and the other prior art of record do not teach “a multiplexing order generation unit operable to generate order information indicating an order of packets to be multiplexed to form the first stream, for every cycle of a predetermined period of time; a multiplexing order storage unit operable to store the order information; a flag generation unit operable to generate a flag indicating a state of how the order information is stored in the multiplexing order storage unit; and a multiplexing total number control unit operable to determine a total number of packets to be multiplexed*

for every cycle of the predetermined period of time, based on the flag generated by the flag generation unit and operable to control the multiplexing order generation unit based on the determined total number of packets, wherein the multiplexing order generation unit is operable to generate the order information so that a sum of a number of the null packets and a number of the packets of the first packet stream multiplexed for every cycle of the predetermined period of time is equal to the determined total number of packets" in combination with the other limitations of claim 1.

Regarding claims 4, 5, and 7-11, these claims are further limiting to claim 1 and are thus also allowable over the prior art of record.

Regarding *amended* claim 12, this claim is allowable for the same reasons as indicated for *amended* claim 1 above.

Regarding *amended* claims 13 and 14, these claims were amended to include method steps analogous to the above apparatus limitations of *amended* claims 1 and 12, and are therefore allowable for the same reasons as indicated for *amended* claims 1 and 12 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
